

# The Impact of COVID-19 on Rural and Tribal Water and Wastewater Systems

# ILLINOIS

#### FINANCIAL VIABILITY

How long respondents can continue to pay for all system expenses under the current financial circumstances due to COVID-19:

N/A: Already could not

cover all

Less than 2 months

2 to 6 months

7 to 12 months

a year

More than Don't know/ Don't want too early to tell

to answer

17% of all IL respondents cannot sustain losses for more than six months of current financial conditions

of financial conditions:

- Challenges faced because Maintaining their system Paying bills, like electricity
  - Paying back existing debt

## 6 respondents

100% of respondents were small systems

≈ 814 residents

Average system size of respondent

#### **FACILITIES TYPE:**

50% water | 33% both 17% wastewater

### **0-1:** Average full-time staff size

Many supplement with part-time, contract or volunteer staff

Has the COVID-19 pandemic negatively impacted your system's financial position, or do you anticipate negative impacts?

> 66.6%:Yes 16.7%: No

16.7%: Not sure

# 1 small system respondent

provided detailed financial info and indicated their revenue decreased when comparing April 2019 to April 2020.

(n = 3)

small system respondent median monthly revenue decrease (n = 1)

About the survey: In early May, the RCAP Network surveyed communities to understand the financial impact of the COVID-19 pandemic on rural and tribal water and wastewater systems. Results are from systems the RCAP Network serves and are not representative of all small systems. These results, however, provide an important snapshot of rural and tribal experiences so policymakers can make informed decisions on how to address these issues during COVID-19 recovery.
