About the survey: In early May, the RCAP Network surveyed communities to understand the financial impact of the COVID-19 pandemic on rural and tribal water and wastewater systems. Results are from systems the RCAP Network serves and are not representative of all small systems. These results, however, provide an important snapshot of rural and tribal experiences so policymakers can make informed decisions on how to address these issues during COVID-19 recovery.

Communities Unlimited, the Southern RCAP, serves seven states in the southern United States, an area with many rural communities, a high minority population, high poverty and food insecurity. Through human connection and ingenuity, combined with cutting-edge technology and expertise, CU reveals the unlimited potential in the people and in the places with which they work. **Visit communitiesu.org for more info.**
