The Impact of COVID-19 on Rural and Tribal Water and Wastewater Systems

ARKANSAS

Has the COVID-19 pandemic negatively impacted your system’s financial position, or do you anticipate negative impacts?

- 67% : Yes
- 23% : No
- 10% : Not sure

58 respondents

98% of respondents were small systems \( (n = 56) \)

≈ 2,300 residents

Average system size of respondent

FACILITIES TYPE:

- 29% water
- 62% both
- 9% wastewater

3-4: Average full-time staff size

Many supplement with part-time, contract or volunteer staff

FINANCIAL VIABILITY

How long respondents can continue to pay for all system expenses under the current financial circumstances due to COVID-19:

- N/A: Already could not cover all costs
- Less than 2 months
- 2 to 6 months
- 7 to 12 months
- More than a year
- Don’t know/too early to tell
- Don’t want to answer

31% of all AR respondents cannot sustain losses for more than six months of current financial conditions

Challenges faced because of financial conditions:

- Maintaining their system
- Paying bills
- Paying staff
- Delays/limitations to capital improvement

About the survey: In early May, the RCAP Network surveyed communities to understand the financial impact of the COVID-19 pandemic on rural and tribal water and wastewater systems. Results are from systems the RCAP Network serves and are not representative of all small systems. These results, however, provide an important snapshot of rural and tribal experiences so policymakers can make informed decisions on how to address these issues during COVID-19 recovery.

Communities Unlimited, the Southern RCAP, serves seven states in the southern United States, an area with many rural communities, a high minority population, high poverty and food insecurity. Through human connection and ingenuity, combined with cutting-edge technology and expertise, CU reveals the unlimited potential in the people and in the places with which they work. Visit communitiesu.org for more info.
