About the survey: In early May, the RCAP Network surveyed communities to understand the financial impact of the COVID-19 pandemic on rural and tribal water and wastewater systems. Results are from systems the RCAP Network serves and are not representative of all small systems. These results, however, provide an important snapshot of rural and tribal experiences so policymakers can make informed decisions on how to address these issues during COVID-19 recovery.

The Great Lakes Community Action Partnership (GLCAP), the Great Lakes RCAP, began as a Community Action Agency more than 50 years ago serving Ohio and has since expanded to seven states. GLCAP provides rural development solutions for small communities for a variety of needs. Visit glcap.org for more info.
