The Impact of COVID-19 on Rural and Tribal Water and Wastewater Systems

WASHINGTON

FINDINGS FROM THE RCAP NETWORK NATIONAL COMMUNITY SURVEY

FINANCIAL VIABILITY
How long respondents can continue to pay for all system expenses under the current financial circumstances due to COVID-19:

- N/A: Already could not cover all costs
- Less than 2 months
- 2 to 6 months
- 7 to 12 months
- More than a year
- Don't know/too early to tell
- Don't want to answer

50% of respondents are not sure how long they can cover all costs under current financial conditions

Challenges faced because of financial conditions:
- Keeping staff
- Maintaining their system
- Delays/limitations to capital improvement

About the survey: In early May, the RCAP Network surveyed communities to understand the financial impact of the COVID-19 pandemic on rural and tribal water and wastewater systems. Results are from systems the RCAP Network serves and are not representative of all small systems. These results, however, provide an important snapshot of rural and tribal experiences so policymakers can make informed decisions on how to address these issues during COVID-19 recovery.

The Rural Community Assistance Corporation (RCAC), the Western RCAP, provides training, technical and financial resources and advocacy so Western rural communities can achieve their goals and visions. RCAC works with rural water, wastewater and solid waste systems to make them sustainable. Their environmental services are directed to small, low-income communities in rural areas and Indian Country to ensure that they comply with state and federal regulations. Visit rcac.org for more info.
