

MEETING HEALTH & SAFETY PROTOCOLS

We will implement the following guidelines for the 2022 RCAP National Conference:

RCAP's number one priority is the health and safety of our event participants and industry partners. Our goal is to hold a safe event, recognizing it is not possible to remove all risks, in particular concerning COVID-19. RCAP will put required measures in place to provide a safe environment for its event attendees. Policies for each meeting will be set according to CDC and public health recommendations, federal, state, and local regulations applicable at the time of the event, and what RCAP deems necessary to manage the risk for its event attendees. RCAP may change, update, or add to these requirements at any time as it deems prudent to best protect the health and safety of attendees and others, and attendees must comply with relevant policies and requirements as communicated by RCAP.

RCAP cannot be held liable for COVID-19 cases arising because of event attendance and currently requires of all attendees at RCAP in-person meetings and events:

1. **Proof of full vaccination against COVID-19 or negative PCR test or at-home antigen test**
2. If you are providing a negative test, please put your name, date/time of test within the image you are uploading
3. **Mask wearing is encouraged and optional.**

Vaccination Requirements

- Proof of full vaccination will be verified prior to entrance. We have partnered with Vital Circle to assist in our Covid-19 procedures. Please click on [RCAP National Conference](#) to verify your status.
- Proof of full COVID-19 vaccination means documentation that the individual is at least two weeks past the full primary two-injection course of the Pfizer-BioNTech or Moderna vaccines or a single shot of the Johnson & Johnson vaccine.
 - Consistent with CDC guidance, RCAP also strongly encourages attendees to receive a booster dose of either the Pfizer-BioNTech or Moderna vaccines once eligible (i.e., six months after completion of the primary sequence of the Pfizer-BioNTech or Moderna vaccines or two months after a primary Johnson & Johnson injection).
- Proof of negative test must be submitted 72 hours prior to arrival to the conference.
- Attendees will be expected to take common actions to reduce the risk of COVID transmission and to behave responsibly (including leaving the event area) in case of exposure to a COVID case or experiencing symptoms.
 - In such case, attendees should seek appropriate medical attention, including a COVID-19 test, and must immediately inform RCAP should a COVID-19 test be positive during the event or in the 14 days following the event.
- Protect yourself by frequent hand washing/sanitizing and minimizing face touching.

What should I do before I arrive?

Bring a mask; while it is not required, you may want to wear a mask while indoors when you are not eating or drinking.

Failure to comply with all safety protocols and requirements as listed above or related directions from RCAP representatives on-site may result in the loss of the right to attend or participate in RCAP events.
